Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-9 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-9 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 8, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 6,305,318 to Ford.

Regarding Claim 1, Ford teaches a pet bed for use by cats (Col. 1 line 11), said pet bed comprising a resilient, compressible fill material (#13), and an outer shell fabric (#2) defining the geometry of the pet bed as having a bottom and sides and a top, the later comprising a plush and gas permeable fabric (Col. 2 line 24-29), a closable opening in said outer shell fabric allowing for selective access to the interior of said outer shell fabric (Fig. 2 #9), a gas permeable pouch (#19) containing catnip located beneath said top fabric such that scent from said catnip is caused to permeate through the said gas permeable pouch and gas permeable top fabric.

Regarding Claim 2, Ford teaches the said gas permeable pouch (#19) containing catnip is located between said resilient compressible fill material and said top fabric (Fig. 5).

Regarding Claims 8 and 9, Ford inherently teaches that said top fabric is depressed by the weight of the cat using said pet bed, scent from said catnip is caused to permeate through said gas permeable pouch and gas permeable top surface or when

Art Unit: 3643

said gas permeable pouch is squeezed, scent from said catnip is caused to permeate through said gas permeable pouch and gas permeable top surface occurs when the animal is present on top of the bed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 6,305,318 to Ford.

Regarding Claim 3, Ford is silent on the gas permeable pouch containing catnip is located beneath said resilient compressible fill material. However, it would have been obvious to one of ordinary skill in the art to modify the teachings at the time of the invention since the modification is merely the shifting location of a known element performing the same intended function and does not present a patentably distinct limitation [*In re Japikse*, 181 F.2d 1019, 1023, 86 USPQ 70, 73 (CCPA 1950)].

Regarding Claims 5 and 7, Ford as modified teaches the gas permeable pouch is selectively attachable to an interior surface of said top fabric by providing said interior surface with a fabric pocket sized to receive said pouch (Fig. 5).

Regarding Claim 6, Ford teaches that hook and loop fasteners are a known means of securing things in place (#9), but is silent on said gas permeable pouch is selectively attachable to an interior surface of said top fabric by hook-and-loop

fasteners. However, it would have been obvious to one of ordinary skill in the art to modify the teachings of Ford at the time of the invention with a known fastening means to prevent the catnip from becoming undesirably displaced.

Regarding Claim 4, Ford is silent on said gas permeable pouch is characterized as having a closable opening so that catnip can be periodically refillably introduced to said pouch. However, it is old and notoriously well-known to provide recyclable pouches as an environmentally sound practice to reduce waste. It would have been obvious to one of ordinary skill in the art to modify the teachings at the time of the invention for the cost reducing and environmentally beneficial results.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
